INTRODUCTION

- i. In December 2013 Richmondshire District Council carried out an update to the 2010 Strategic Housing Land Availability Assessment (SHLAA) producing the SHLAA Update 2013.
- ii. NPPF sets out the requirement for Local Planning Authorities (LPA) to carry out a SHLAA in order to identify a sufficient supply of deliverable housing sites for the first 5 years. A further supply of developable sites should also be identified for years 6 – 10 and ideally years 11 – 15 but where this is not possible indicate broad locations for future growth.
- iii. The assessment of site deliverability and developability and the identification of potential sites in the SHLAA does not indicate that planning permission will be granted for new development or be allocated in Development Plan Documents (DPD). Planning proposals on sites identified in the local authority SHLAA report will be judged on their merits against the Development Plan policies unless material considerations indicate otherwise. The SHLAA report may represent material consideration in the determination of such planning proposals.
- iv. Maps for most of the sites included within this document can be found within Tables 1 & 2 of the SHLAA June 2010. To view these documents please visit www.richmondshire.gov.uk/planning/planningpolicy/deliveringdevelopmentplan.aspx or click [SHLAA 2010](#)
- v. The SHLAA refers to the Core Policies (CP) and Spatial Principles (SP) of the Richmondshire Local Plan Core Strategy (LCPS), which provide the context for enabling development in the plan area up to 2028. These policies and principles can be viewed at [http://www.richmondshire.gov.uk/pdf/SD001%20Richmondshire%20Local%20Plan%20Core%20Strategy%20Low%20Res%20\(August%202012\).pdf](http://www.richmondshire.gov.uk/pdf/SD001%20Richmondshire%20Local%20Plan%20Core%20Strategy%20Low%20Res%20(August%202012).pdf). The LCPS was submitted for statutory examination in February 2014.
- vi. New information relating to the Examination is added to the Richmondshire District Council web page on a daily basis so please visit the website to keep up to date with its progress at www.richmondshire.gov.uk/planning/localplan/localplan2012-2028/corestrategyexamination.aspx

Expected delivery of land assessed relative to Spatial Principle SP4: The Scale and Distribution of Development in hectares.
- 11 [SP4: SPATIAL DISTRIBUTION: DENSITY \(D.P.H\)](#)
Spatial distribution of average density assessed relative to Spatial Principle SP4: The Scale and Distribution of Development up to 2028.

JUSTIFICATION

This document provides a detailed site list of strategic housing land that has been assessed for development on an individual basis according to principles set out by the NPPF:

5 Year Supply Criteria:

To be considered deliverable:
Sites should be **available now**
Offer a **suitable location** for development now

Be **achievable** with a realistic prospect that housing will be delivered on the site within five years
Development of the site is **viable**

10 Year Supply Criteria

To be considered developable:
Sites should be in a **suitable location** for housing development
Should be a **reasonable prospect** that the site is **available** and
Could be **viably developed** at the point envisaged

15 Year Supply Criteria

Broad locations for development

Broad locations have been identified within the LPCS Strategic Development Growth Areas of Leyburn, Catterick Garrison and Richmond

The document then assumes a base line target of 180 dwellings per annum for a 15 year period.

Paragraph 47 of NPPF requires a local planning authority to identify and annually update a supply of specific deliverable sites sufficient to provide five years worth of housing against their housing requirements with an additional buffer of 5% (moved forward from later in the plan period).

Where there has been a record of persistent under delivery of housing, the NPPF also requires local planning authorities to increase the buffer to 20% (moved forward from later in the plan period).

The Council does not believe a 20% buffer is necessary based on past performance, but it is recognised as a useful tool to ensure that housing delivery targets can be met. The Land Supply analysis tables are based upon a 20% buffer on target within the first 5 years. The Land Supply demonstrates the capacity for the 20% buffer within the first five years.

It is necessary to assess the spatial distribution of the land supply in relation to defined spatial principles within the Local Plan Core Strategy.

This enables the Council to identify relative under or over supply of land in any one of the 11 defined areas based on preferred SP4 spatial distribution targets.

The characteristics of sites within the Land Supply are important to assess in order to monitor performance, conditions or output relating to density and the re-use of PDL (brownfield land).

CALCULATION ASSUMPTIONS

Core Strategy Target is 180 dwellings per Annum

All analysis tables are related to a 20% buffer scenario

30 dwellings delivered per outlet per annum

Where informed data not available, average density = 30 d.p.h approx

No attempt to phase development

NOTES FOR READING THE DOCUMENT

The work sheets are ordered sequentially from left to right

All tables are interlinked through formulae.

Information expressed within the Land Supply Sites list is analysed within the remaining specialised tables

Surplus to Plan' illustrates the dwellings expected to be delivered beyond this 15 year period on a particular site.

Spatial Principle SP2: Settlement Hierarchy

A settlement hierarchy is defined to organise development and service provision in the plan area and improve links between the settlements in the hierarchy, particularly by public transport.

The levels of the hierarchy are as follows:

- **Principal Towns:** Richmond and Catterick Garrison acting in a complementary manner to constitute the main focus in the plan area for housing, employment, shopping, leisure, education, health and cultural activities and facilities
- **Local Service Centre:** Leyburn serving the needs of its surrounding sub area, in particular providing appropriate levels of market and affordable housing, job opportunities and assisting in achieving long term economic and social sustainability
- **Primary Service Villages** with key services to supplement those provided in the towns to help meet the needs of the dispersed rural communities
 - Central Richmondshire: Brompton on Swale, Catterick Village and Scorton
 - Lower Wensleydale: Middleham
 - North Richmondshire: Barton, Melsonby and Middleton Tyas
- **Secondary Service Villages** settlements with fewer services that support the needs and sustainability of rural communities
 - Lower Wensleydale: Finghall-Harmby-Spennithorne and Hunton
 - North Richmondshire: Aldbrough-Caldwell-Eppleby, Dalton-Newsham-Ravensworth, Gilling West and North Cowton
